Education

University of Central Florida

May 2027

Bachelor of Science in Computer Science

Orlando, FL

- **Relevant Coursework:** Systems Software, Discrete Structures, AI for Game Programming, Computer Logic & Organization, Security in Computing, Data Structures & Algorithms
- **Clubs:** Girls Who Code, Women in Electrical Engineering and Computer Science

Skills

Languages: Python, C/C++, JavaScript, C#, HTML/CSS, GML

Frameworks/Libraries: React, MUI, Bootstrap, NumPy, Tkinter, Matplotlib, Pygame

Developer Tools: Git, GitHub, Visual Studio, JetBrains, Trello, Cursor AI, Microsoft Suite, Adobe

Game Engines: Unity, GameMaker

Experience

Game Developer & Version Control Lead

Dec 2025 – Present

barque 42

Remote

- Developing *Octoportals* as part of a fully remote, international indie game development team.
- Managing Git workflows, branches, merges, pull requests, and repository organization to support team collaboration.
- Contributing gameplay implementation, bug fixing, and technical iteration for an action-focused indie title.

Freelance Game Developer

Apr 2024 – Present

Independent Contractor

Remote

- Delivering gameplay programming, debugging, and feature iteration for indie game clients.
- Contributed to public-facing Steam projects including *Air Hares* and *My Drug Cartel*.
- Supported Nintendo Switch porting work for *Air Hares*, adapting gameplay and technical systems for console release requirements.

Undergraduate Machine Learning Research Assistant

Jan 2026 – Apr 2026

University of Central Florida

Hybrid

- Evaluated large language model outputs across benchmark datasets, supporting analysis of response quality and labeling behavior.
- Performed annotation, comparison, and consistency-review tasks to support model-versus-human labeling evaluation workflows.

Project Manager & Full-Stack Developer

Oct 2025 – Dec 2025

Girls Who Code @ UCF

Orlando, FL

- Led a group of 5 women in STEM to build a Chrome extension for student productivity and study planning.
- Coordinated weekly meetings, assigned Trello tasks, and maintained milestones across design and development.
- Developed React and JavaScript features while overseeing front-end and back-end integration.

Projects

bugOS | Raspberry Pi, Python, Pygame, Twilio

May 2026 – Present

- Designing a Raspberry Pi Zero 2 W dumb phone prototype with mechanical buttons, a small display, and Wi-Fi communication support.
- Building a Python/Pygame phone UI with call states, credential management, contacts, messages, settings, and hardware-button input.

Elemental Ascent | GameMaker, GML, 2D Game Development

Jan 2026 – Apr 2026

- Served as Gameplay/Input Systems Programmer on a 5-person team developing a 2D rhythm-based, turn-based combat game.
- Implemented timing-based sequence mechanics, input handling, and keyboard/controller support for combat interactions.
- Developed cutscene management and room transition systems to support story mode flow and gameplay progression.

Waste Sorting App | React, JavaScript, MUI

Sep 2025 – Dec 2025

- Developed the front-end of a full-stack waste sorting web app with WEECS, integrating object detection and recycling classification features.
- Built React components with MUI to display waste history, environmental impact, and CO₂ savings per user.
